

Patient Care Facilities

Doctors' Hospital Sseguku

A concise guide to inpatient, critical-care and maternity facilities available at the hospital.

For admissions and current facility availability, call +256 705 555 117 or +256 782 523 453. The hospital is located 10 km along Kampala-Entebbe Highway in Sseguku.

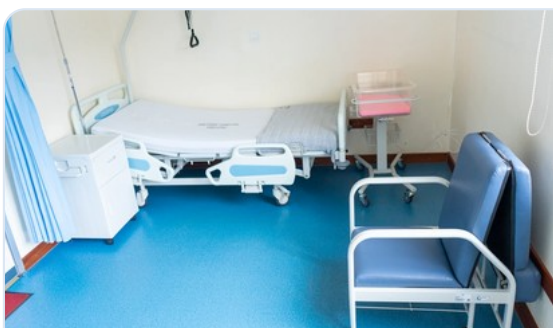

Ward and private-room accommodation

Patients are allocated to an appropriate facility according to clinical need and current availability. Reception can provide information about admission requirements and current room options.

General Ward

Shared inpatient accommodation for patients admitted under hospital care, with nursing observation and treatment provided according to the clinical plan.

VIP Rooms

Private-room accommodation for admitted patients. Allocation depends on clinical need and current availability at the time of admission.

Executive Rooms

Private accommodation in the Executive room category. Reception can provide current information about room availability and admission requirements.

Critical-care and maternity facilities

These facilities support patients who need a higher level of monitoring or maternity care. Admission and use are based on clinical assessment.

Intensive Care Unit

Critical-care assessment and continuous monitoring for patients who need close observation after serious illness, emergency treatment or surgery. ICU admission depends on clinical assessment and bed availability.

Labour Room

Assessment and support through labour and delivery, with maternity and theatre services available when clinically indicated.
